

HOW TO ENDORSE TEAM MEMBERS

Clinical Research Management System (CRMS)

Updated 9 Dec 2025

ECOS - PI ENDORSEMENT NEEDED!

Anyone in the **CRMS study site User Authorisation List (UAL)** can add others to the study site UAL

PLEASE ADD US!

Sponsor

Study Administrator

Study Team Member

I finally added ALL my team members in the UAL!

Time to Party Again!

Co-Investigator

I got an email asking me to endorse new users in my **CRMS study site UAL**

What am I supposed to do...

Principal Investigator

The PI needs to check and endorse if the new users added to the UAL are legit

As PI **MUST** have oversight of who is accessing their study site information

I GOT THE POWER!

Principal Investigator

If a Sponsor, Study Team Member or Study Administrator no longer requires access to the study, they can **deactivate** themselves on the UAL

Others can help to deactivate too!

Bye

- **Addition or removal of PI, Site-PI and Co-I** will need to be updated in the IRB application form and submitted to DSRB for review. Changes in the IRB application form will automatically be synced to the CRMS UAL.
- PI endorsement is **site specific** (i.e., for multi-site studies, each PI and Site PI will need to endorse for their own site).

Principal Investigator (PI)

How Do I Endorse My Team Members on ECOS?

1

Locate Your Study

- Go to CRMS **Study Member Review** tab

Step 1: Click on "CRMS"

Step 2: Click on "Study Member Review"

2

Endorsement

- Select your study
- Team members requiring PI endorsement will have the **Role status "Pending PI Endorsement"**
- You can either **Endorse** or **Reject** the addition of the team member

Step 3: Click on dropdown to select your study

Step 4: Click on the checkbox on the header for batch endorsement

Step 5: Click on "Endorse"

YOU CAN ALSO PERFORM BATCH ENDORSEMENT!

The CRMS User Guide is now available here: [User Guides](#)
